Dairy Data Tools

Your farm's DairyComp and EZfeed records, read by your AI assistant.

Ask in plain words. Get the pen's numbers back as a card.

Free and open source · by Pádraig Lucey, MVB, MPVM, Ph.D., DACVPM-Epi

Ask it like you'd ask a person

"How is pen 21 doing?"

"What's pen 21's feed efficiency and IOFC at $21.50 milk?"

"Get me ready for Thursday's visit."

"What do I type in DairyComp to export what you need?"

The numbers come from small, tested scripts that read the farm's own exports, not from the AI's guesswork.

A pen

Pen 21

129 cows · Milking cows · Aug 15 to Oct 28

Milk per cow, last test
86.0 lb ECM 89.8 lb

Highest of 3 pens · middle 80%: 56–119 lb

Days in milk
173 median

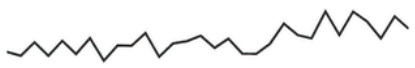

Middle 80%: 62–320 days

Lactation
3 median

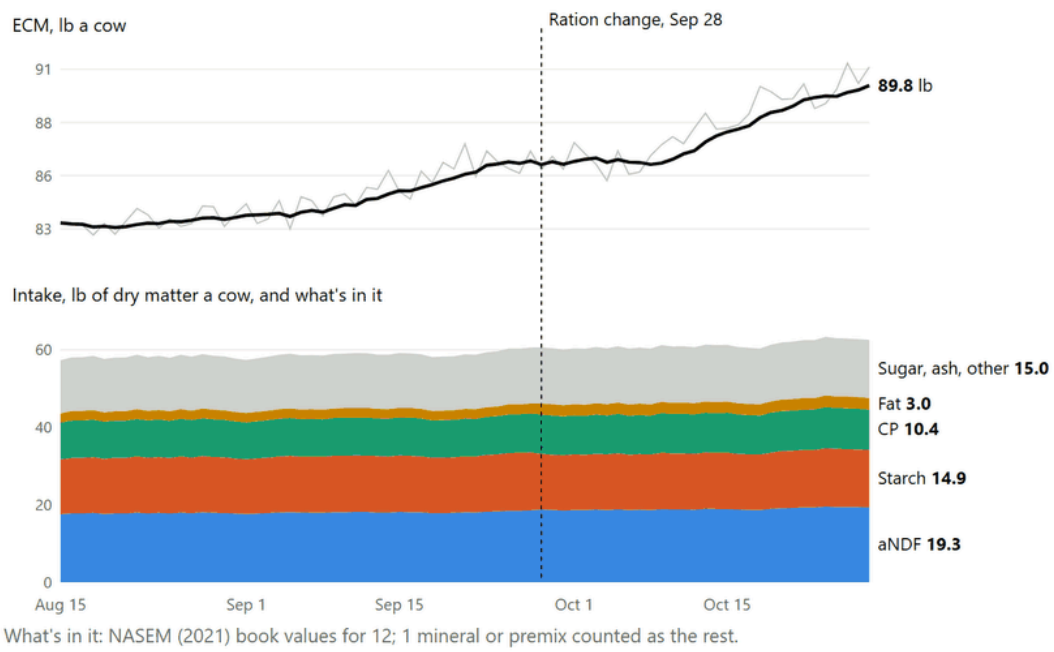

2nd 47 · 3rd+ 82

Intake, last 7 days
63.0 lb DM per cow

Called for 62.9 lb · daily, last 30 days

What's in it: NASEM (2021) book values for 12; 1 mineral or premix counted as the rest.

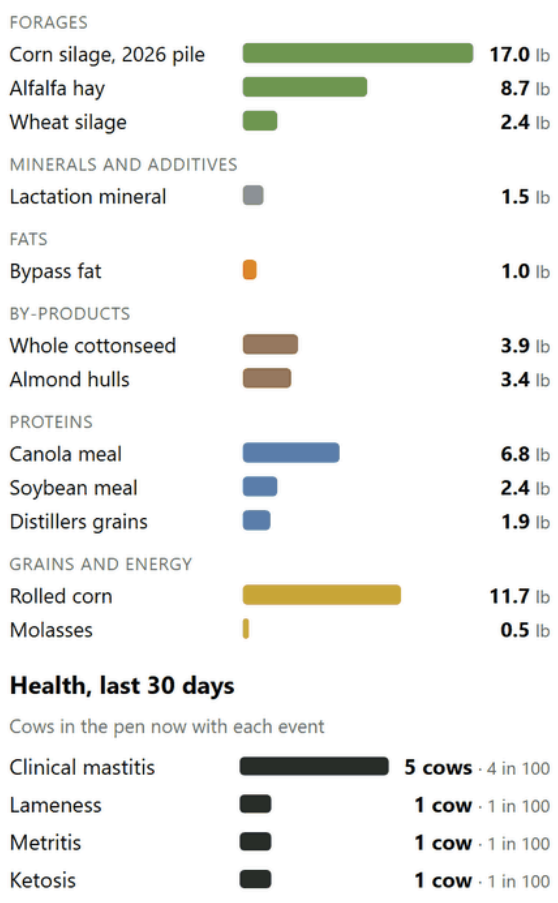

Feed, last 7 days

ECM per lb DM	Feed per cow	Feed per cwt
1.43	**$10.61**	**$12.34**

Delivered feed, per cow in the pen

Ration, last 7 days

lb of dry matter per cow, called for

Health, last 30 days

Cows in the pen now with each event

From DairyComp's cow, test and event reports, EZfeed's intake and pen summary reports, pen milk by day. Records end Oct 28, 2026. ECM = 0.327 × milk + 12.95 × fat lb + 7.65 × protein lb, worked out here. Intake is delivered, per DairyComp head.

Milk by day, the pen's ration as it is now with every feed named, and below it feed cost per cwt, efficiency and health.

A cow

Cow 3004

Pregnant 137 d

Pen 21 · Holstein · 6th lact

76 lb, last test

199 DIM

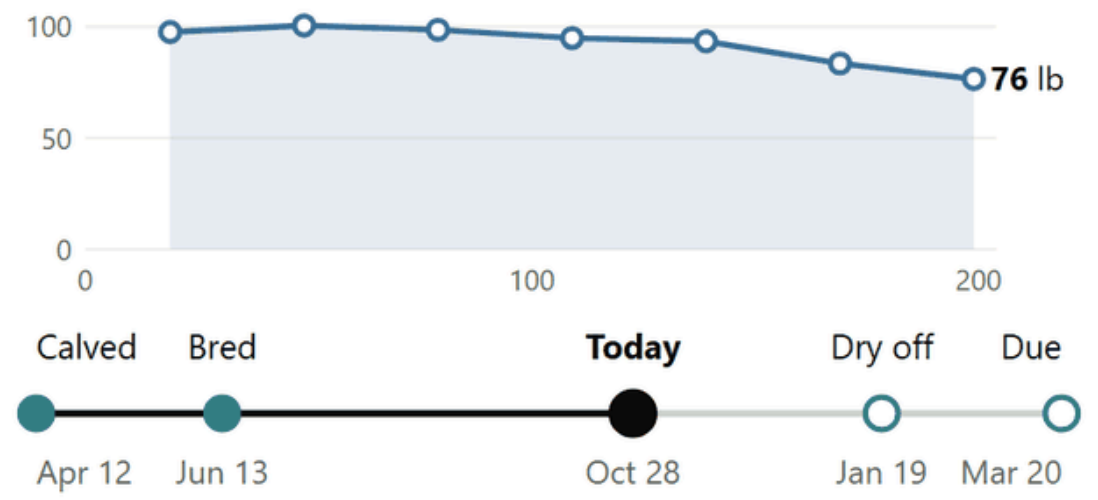

Bottom 39% of pen 21, last test (129 cows)

Her milk against pen 21, last test (lb)

Lowest 16 · her 76 · highest 162

Her milk this lactation, lb by days in milk (each test)

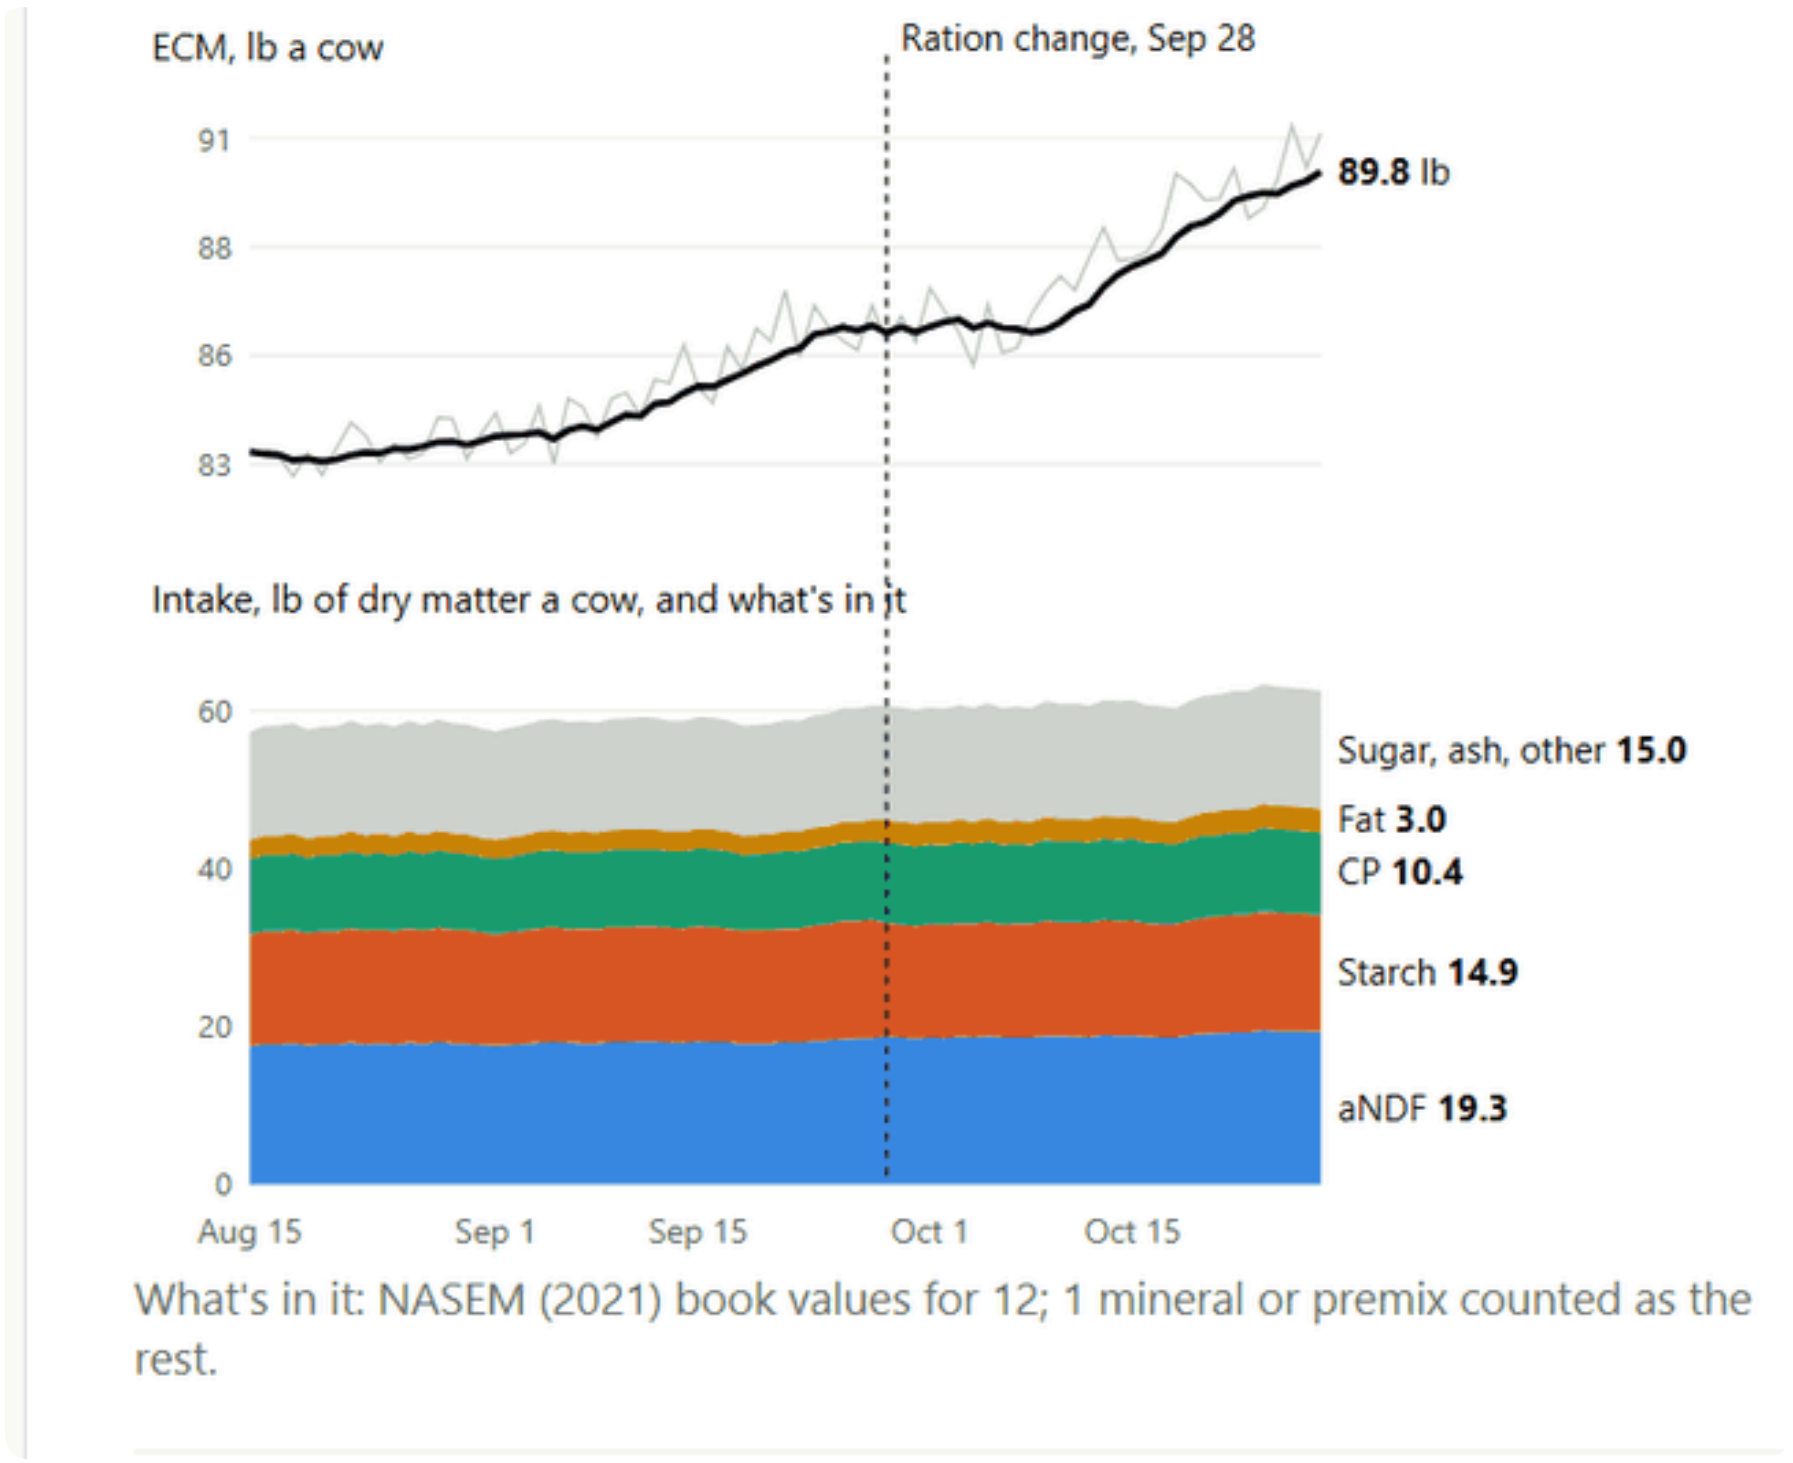

Fat · protein	ECM, last test	SCC
4.1% · 3.4%	**85 lb**	**527k**

Sep 13	**Moved**
Aug 14	**Vaccination**
Jul 17	**Moved**
Jul 14	**Checked pregnant**

+4 earlier this lactation

From DairyComp's cow and event reports. Records end Oct 28, 2026. Days in milk counted from her fresh date; ECM and her place in the pen worked out here.

What's in the ration, day by day

Intake split into aNDF, starch, protein, fat and the rest, with the ration change marked. From the farm's own feed analyses when it has them, NASEM 2021 book values when it doesn't, and the card says which. (Sample herd.)
